Art Unit: 3751

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19 and 22, drawn to a fluid transfer system, classified in class 141, subclass 144.
- II. Claims 20 and 21, drawn to a fluid transfer method, classified in class 141, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II. and I. are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as a method not requiring details to a liquid ring pump or explicit first and second containers.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Charlton Shen on 10-14-04 to request an oral election to the above restriction requirement, but did not result in an election being made, *since Mr. Shen appears to no longer work for the associated law firm.*

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3751

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
